If you are an experienced IT professional with industry certifications or starting your path to a career in information systems, you may be able to complete your MCC certificate or degree in less time than you think! In many cases, there is a certification exam you can take that will count as an MCC course. You can choose to take the class for credit or sit for the industry exam – either can count toward your MCC degree or certificate program.

If you hold a current industry certification from the list below, you can request credit by certification at any MCC campus. Simply bring documentation of passing the current industry certification exam(s) and photo identification to the nearest MCC campus to get the credit added to your transcript.

Cisco Certified Entry Networking Technician (CCENT) qualifies for credit as CSIS112 Introduction to Networks CCNA I and CSIS 113 Routing and Switching Essentials CCNA II

Cisco Certified Network Associate (CCNA) qualifies for credit as CSIS 112 Introduction to Networks CCNA I, CSIS 113 Routing and Switching Essentials CCNA II, CSIS 212 Scaling Networks CCNA III, and CSIS 213 Connecting Networks CCNA IV
