Dr. Beatty, I am proud to say — for my little girl and for a lot of little girls around this community — you are a great role model.

State Sen. John Rizzo

My experience in working with Dr. Beatty has taught me that she has the vision to navigate today’s challenges and the passion needed to lead Metropolitan Community College to thrive as you have never before.

Keynote speaker Dr. Christine Johnson McPhail (pictured, right), Dr. Beatty’s mentor

We’ve got great momentum going right now. That momentum is going to take us into the next atmosphere. That momentum is going to change lives in this city. I’m excited about where we’re going. I’m excited about where we are.

Dr. Kimberly Beatty in her inaugural address (pictured with Board of Trustees President Trent Skaggs)

Dr. Beatty brings to this role an extraordinarily clear vision for MCC’s role as an economic development engine.

Zora Mulligan, Missouri commissioner of higher education

We’ve got great momentum going right now. That momentum is going to take us into the next atmosphere. That momentum is going to change lives in this city. I’m excited about where we’re going. I’m excited about where we are.

Dr. Kimberly Beatty in her inaugural address (pictured with Board of Trustees President Trent Skaggs)
Since becoming a multi-campus system in 1969, MCC never had one single mascot. That changed in 2017-18, when students and the College community proposed and voted on a new mascot. MCC Wolves, representing not just the sports teams but the institution as a whole, became official in Fall 2018.

Speaking of sports, MCC consolidated teams under one National Junior College Athletic Association membership and announced the addition of men’s cross country and men’s and women’s golf. The College also offers men’s and women’s basketball, men’s and women’s soccer, women’s volleyball, softball and baseball.

The single NJCAA membership will allow student athletes to attend classes on any MCC campus instead of being limited to the campus where their sports team is based.

Middle College Helps Students Recommit to Education

Two Oak Park High School sophomores — one a potential electrician, the other a future construction manager — helped launch the Kansas City Construction Career Academy at a ceremony in April. Upon successful completion of the two-year program at MCC’s Business & Technology campus, students will have earned not only their high school diploma but also an A.A.S. degree from MCC in construction and building maintenance.

The new early college program is a partnership of MCC, North Kansas City Schools and JE Dunn Construction.

Through the program housed at MCC-Penn Valley, students ages 18 to 24 access success workshops, online coursework and direct instruction to earn a KCPS high school diploma or high school equivalency credential. After that, the focus turns to post-secondary options, including staying at MCC to earn an associate degree or workforce certificate.

Tuition for students’ community college or technical education classes is paid for by the Full Employment Council, which also helps them find jobs.

The new program gives students the chance “to recommit themselves to education and realize their dreams,” Chancellor Kimberly Beatty said at a February signing ceremony.

“I like working at MCC because I believe we elevate our community and enrich people’s lives,”

Joel Shaw, MCC Online instructional designer

The mascot design was revealed at campus parties in April. This was the scene at MCC-Blue River.
YEAR IN REVIEW

An Innovative Partnership That Leads to Jobs

The Burns & McDonnell Design Innovation Lab was the first partnership of its kind at MCC, but Chancellor Kimberly Beatty resolved it wouldn’t be the last. During the lab’s October grand opening at MCC-Business & Technology, the chancellor challenged other industry partners to replicate the idea.

The Design Innovation Lab is refurbished classroom space with new desks, computers and a 36-inch plotter for printing blueprints. The lab also serves as home base for supplemental instruction for a handful of high-performing computer-aided drafting/design (CADD) and engineering technology students. Burns & McDonnell employees facilitate the weekly sessions.

Four students were selected for the program in Fall 2017 and six the following semester. Each week, students immerse themselves in real-world engineering projects. Best of all, successful participants are considered for employment at Burns & McDonnell. The engineering firm hired six MCC students in 2017-18.

OTHER NEW PARTNERSHIPS

• An associate in arts degree from MCC now meets University of Kansas general education requirements. MCC students can also earn a “Degree in 3” from KU — a bachelor’s degree three years after high school. High-achieving students take a year’s worth of MCC courses in high school, spend another year on an MCC campus, then the final two years at KU Edwards Campus.

• Through the Innovation Track program, Lee’s Summit R-7 high school juniors and seniors can take up to 30 hours of classes on the MCC-Longview campus, starting in Fall 2018. The goal is to save students time and money on a college degree.

• FastTracks, a partnership between MCC and Northwest Missouri State University, started enrolling students for Fall 2018. It lets students earn an MCC associate degree and a Northwest bachelor’s degree in four years without leaving the Kansas City area, thanks to Northwest’s campus in Gladstone. FastTrack’s degree programs — four during the pilot year — are expected to expand in Fall 2019.

Nationally Honored Instructor Inspires the Scientists of Tomorrow

Terry Davin, a beloved biology instructor at MCC-Penn Valley, was named one of 49 recipients of a new national award for community college faculty. He was the only Missouri winner of the American Association of Community Colleges’ Dale P. Parnell Distinguished Faculty award.

Davin, a teacher for 35 years, joined MCC full time in 1990. Two decades ago, he teamed with Penn Valley history instructor Greg Sanford to create a history/biology learning community, combining their two disciplines into a single class.

“No in my classes, students become the biologist or historian and have to logically work through a problem and look for information that will allow them to solve the problem,” Davin said. “It’s more difficult for the student, but in the end they learn the material better, and for most they enjoy the class more.”

Nancy Harrington, chair of the campus’ Science, Math and Engineering Division, said that when she has the opportunity to observe Davin’s students in the lab, “I see focus, discovery, concentration, questioning and inspiration. These are the ingredients for the scientists of tomorrow.”

These MCC employees were recognized at the Missouri Community College Association convention in Branson in November:

• AWARD OF DISTINCTION: Karen Curls, MCC-Penn Valley criminal justice instructor (pictured, second from left, with Dr. Tyjaun Lee, Dr. Kimberly Beatty and Trustee Barbara Anne Washington)

• SENIOR SERVICE AWARDS: Parmajit (Rani) Duggal, MCC-Maple Woods biology instructor; Bob Florence, MCC-Blue River community relations coordinator; Julianne Jacques, MCC-Penn Valley counselor; Geneva Wilson, MCC-Longview administrative assistant

Terry Davin in the lab with an MCC-Penn Valley student.
MCC-Blue River student and Marine Corps veteran Joshua Gray was named one of 20 members of the 2018 All-USA Academic Team, an honor that came with a $5,000 scholarship. Gray, who served in Afghanistan, was also recognized as a 2018 New Century Transfer Pathway Scholar, which included a $2,250 scholarship. Both scholarship programs are affiliated with Phi Theta Kappa, the honor society for students at two-year schools. Gray was president of Blue River’s PTK chapter. He plans were to finish his MCC associate in engineering degree, then transfer. His dream school? That’d be MIT, the Massachusetts Institute of Technology. He eventually wants to become a biomedical engineer and develop robotic prostheses for not only wounded soldiers but anyone else who needs one.

Another student who won a top academic honor in 2018: Blue River’s Monica Fritchey, one of the three Missouri community college students named to the 2018 Coca-Cola Academic Team. She also received a $1,000 scholarship. Fritchey is planning to become a math teacher.

Terrell Tigner, who led MCC-Penn Valley’s Men of Color program, was honored as an ACT College and Career Readiness Champion. He was one of 30 national honorees in the postsecondary category, the only one from Missouri. ACT is the nonprofit organization best known for the ACT test.

Tigner, associate dean of student development at Penn Valley, in 2017-18 (now dean of student services at MCC-Maple Woods), worked with a diverse range of students including minority males. “Terrell stands tall as a beacon of hope for these students, sharing his own story of growing up in Detroit, Michigan, in a community very much like the Penn Valley community,” MCC’s Rene Bennett wrote in a nomination letter.

“He explains how his life was forever changed because of his education, and inspires students to believe in their own ability to have a different life.” An honoree in the workforce category was the Full Employment Council’s Shelley Penn, who was nominated by MCC. The College worked closely with Penn to coordinate career classes at the Jackson County Detention Center.

Our MCC family works hard to make sure we are preparing students to be successful in life.” Kat Painter, senior administrative assistant, MCC-Longview
A chilly November afternoon didn’t keep well-wishers from celebrating the life and dedication of Metropolitan Community College icon Robert H. Martin at the unveiling of a building renamed in his honor. Mr. Martin died April 3, 2017, after serving the College for an unprecedented 41 years on the Board of Trustees. His wife, retired MCC administrator and instructor Ellen Forrest Martin, was on hand as MCC-Longview’s key administrative and student services building was christened the Robert H. Martin Campus Center.

Appointed by the Board of Trustees in 1976 to fill a vacancy, Mr. Martin was first elected to the board in 1978 and subsequently re-elected to six additional terms. “He was clearly living a life of service,” MCC Chancellor Kimberly Beatty said at the naming ceremony.

Colby Cole, MCC-Longview’s student government president, said the renaming honor was “beautiful (because) we are using the name of Robert Martin not to mourn the end of a life, but … to celebrate the thousands of people beginning their lives” as MCC college students.

The Board of Trustees approved an MCC tuition rate for dual credit/enrollment students that is 50 percent less than standard tuition, effective 2018-19. The reduced tuition rate (approved in January) applies to students in school districts that have agreements with the College. Dual-credit students — such as those at the Early College Academy at MCC-Penn Valley (pictured) — will now save just as much on MCC tuition as students who take college classes at high school sites.

“This is a bold move toward equity,” MCC Chancellor Kimberly Beatty said. “We want every student to have access to a higher education and the ability to change their lives. This is the mission of community colleges.”

Brandon Baker, 2018 MCC-Longview graduate

“In talking with community members, I find that most people have some sort of personal connection and a deep respect for MCC.”

Jeremy Davis, MCC economic development manager
MCC launched a skilled trades apprenticeship program in Fall 2017 that combines paid, on-the-job training with college coursework. At the end of an apprenticeship, a student will have acquired not only job skills but also MCC certificates or an associate in applied science degree. The 13 U.S. Department of Labor-approved programs include production technician (16 months), welding (two- and four-year options), building maintenance (two- and four-year), HVAC (three-year) and automotive (four-year).

One of the first MCC apprentices was Anthony Balducci, a maintenance technician at Pratt Industries, which makes corrugated cardboard packages and displays. His first semester, besides working full time, he took two MCC courses, with tuition paid by his employer.

Balducci said he always wanted to go to college but wasn’t sure what he should study. As an apprentice, he has a lot on his plate — work, school and family — but knows he’s building a better future.

Pratt Industries, meanwhile, sees the value of investing in employees. Companies in need of skilled workers can wait for workers to come to them, but sometimes it makes more sense to identify people already on the payroll who could benefit from education and training.

“Engaging our current workforce, and especially the millennial generation, will require an experiential learning process,” said Shonda Atwater, MCC apprenticeship director. “As a region, we must be creative and aggressive if we are to expand economic growth.”

APPRENTICES EARN NOT JUST A SALARY BUT COLLEGE CREDENTIALS, TOO

A BRIGHT, WELCOMING, STUDENT-CENTERED SPACE

MCC-Penn Valley officially opened its new Student Success Center at a ceremony in October. The revitalized space — which involved renovating about 31,000 square feet on the second floor of the Campus Center — features ample seating, study tables, classrooms, private study rooms, computers and even snacks to keep students focused.

The Student Success Center provides collaborative spaces for group study and tutoring sessions. Faculty can hold office hours or class meetings there. It’s also connected to the library, enabling students to easily check out learning materials.

The project was made possible by four major donors — Marion and Henry Bloch Family Foundation, Follett Corporation, David T. Beals III Charitable Trust (Bank of America, Trustee) and the Sunderland Foundation — in conjunction with the MCC Foundation.

“MCC allows me the freedom and flexibility to be the best teacher I can be. Through professional development opportunities and tuition assistance, I have been able to attend national conferences and complete my Ph.D.”

Lynn Canaday, business instructor, MCC-Blue River
Commencement, Class of 2018
Thursday, May 17, 2018
Municipal Auditorium, Kansas City
Candidates for graduation: about 2,600

“More than half of tonight’s graduates are in their 20s. One-quarter of them are over the age of 30. Think you’re too old to go to college or return to college? That’s not the case. These students prove otherwise.”
— Chancellor Kimberly Beatty, the evening’s emcee (pictured, below right)

“Let’s all strive to never stop seeking that thrill of discomfort. Because only when we are uncomfortable do we know we are growing ... and learning ... and striving to reach our ultimate potential.”
— Justin Kelleher, the first student speaker since MCC started holding one unified commencement ceremony for all campuses in 2012

“The No. 1 determinant of a person’s health status is their economic status. And the No. 1 determinant of their economic status is their level of education ... I get to see day in and day out the power and the impact of education.”
— Alumnus Charlie Shields, president and CEO of Truman Medical Centers and president of the Missouri Board of Education

“More than half of tonight’s graduates are in their 20s. One-quarter of them are over the age of 30. Think you’re too old to go to college or return to college? That’s not the case. These students prove otherwise.”

Numbers are from fall semester. Source: MCC Office of Institutional Research and Assessment.
The Metropolitan Community College Foundation honored donors Matt and Judith Flynn at a Gratitude Reception in April. The former MCC-Penn Valley instructors established the Cristo Rey Kansas City Scholarship in 2007 for students graduating from the midtown Catholic high school. So far, 20 students have received the Flynns’ scholarship for study at MCC-Penn Valley.

The couple were presented with the 2018 Vision Award from the MCC Foundation “in appreciation of your dedication to student success,” words that were inscribed on a glass vase filled with fresh flowers.

“It probably should be going to the students,” Judith Flynn said in accepting the honor. “They’re the true heroes.”

Several MCC scholarship recipients attended the event, and others were featured on a video wall.

CHANCELLOR’S MLK SCHOLARSHIP EXPANDS TO FIVE AWARDS

During the first three years of the Chancellor’s Martin Luther King Jr. Scholarship program, one service-minded early college student received the honor annually. But in January 2018, with support from the MCC Foundation, the program expanded. Five students, one from each campus, received awards. To be eligible, students had to show evidence of leadership potential, demonstrate service to the MCC community and beyond, and have at least a 3.25 GPA.

In remarks at the scholarship luncheon, Chancellor Kimberly Beatty referred to the “promissory note” portion of Dr. King’s “I Have a Dream” speech and noted that the community college mission is access to education for all. One could argue that King’s words helped launch the community college charge to democratize higher education, she said.

$560,995

"I want donors to know that their gift really goes a long way. If it wasn’t for their generosity, I don’t know if I’d be in school today."

Jen Bess, MCC-Penn Valley student and recipient of the MCC Foundation Board Scholarship

**Metropolitan Community College Board of Trustees**
Dear MCC friends, colleagues and community members:

The 2017-2018 academic year was a transformational one for Metropolitan Community College, and the work we started should take us to the next plateau. The College’s new vision statement, found in the 2017-2021 Strategic Plan, compels us to become “a high-performing institution that is learning-centered, affordable and aligned around student success.” To get there, we will need to build the necessary institutional capacity, which is why we’ve devoted much time to analyzing key issues within MCC operations. Meanwhile, a realignment of leadership should make the College more student-centered and dedicated to our core mission.

While I am proud of what we accomplished this year, I also recognize that much remains to be done. We must not lose sight of who our students are, where they come from or their individual challenges. We must continue to endeavor to provide MCC students with a consistent experience — no matter which campus they attend or which programs they choose.

I am pleased to report that innovation is in the air at MCC. At our employee in-service in Fall 2017, I told faculty, staff and administrators that I wanted them to dream again and not be afraid to fail. Subsequently, we formed the MCC Innovation Council and held our first Innovation Summit, open to all employees, in June. At our 2018 in-service, innovation was the day’s theme, and three MCC Beta Testers groups had five minutes each to pitch ideas to fellow employees and a panel of judges. One of the pitches, a campus navigational app, was the official winner, receiving a $10,000 innovation grant. But I expect the other two ideas to move forward as well. One is a debt forgiveness program for students who haven’t attended in over two years and who are in arrears for less than $1,000. The other calls for expanding the popular College for Kids program.

I look forward to continuing our momentum. As we like to say around here, MCC is on the MOVE! Thank you for all you do for our students and college community.

Dr. Kimberly Beatty
Chancellor
